

## Common Point WS

Find the common point of the two functions  $f(x) = g(x)$ .

1)  $f(x) = 6 - 5x$  and  $g(x) = 1 - 6x$

2)  $f(x) = 7x + 6$  and  $g(x) = 11 + 2x$

3)  $f(x) = 13 + 6x$  and  $g(x) = 7x + 5$

4)  $f(x) = -6x + 3$  and  $g(x) = -7 - 8x$

5)  $f(x) = 1 + 6x$  and  $g(x) = 7 + 8x$

6)  $f(x) = 3 + 6x$  and  $g(x) = 1 + 6x$
